

Release Passport

Saved report / Version 1 / Checked 2026-09-09

Example answers. This is not a purchased Passport.

A rules check, not a licence, proof of rights or a guarantee of acceptance.

Commercial use of my AI music

We can't confirm this yet

Still needed: All AI tools listed; Whole finished track described; and 2 more.

Service not selected: this case is outside the rules we can check.

Next: Ask the service about this exact use. Adding answers or buying a Passport will not add policy coverage.

Rechecks for this exact file

Manual rechecks end 9 Oct 2026, 00:00 UTC. Your saved versions remain available afterward.

Exact conditions, sources and file details follow.

Detailed conditions and reasons

stage_1 · AI-use disclosure: Cannot determine

Destination disclosure is checked only where an executable rule is listed. Other jurisdiction-specific labelling duties remain outside this check.

Reason: transparency_scope_boundary

Unanswered: Applicable transparency scope

Resolve the listed unknown facts or obtain the exact public policy scope, then check again. You can copy a question and send it to the service yourself.

Provenance: public rule / declared scope

Coverage: declared master · See stage boundary

Rules: none · sources: none

stage_2 · Voice and identity permissions: Cannot determine

This checks declared permission for imitation in the final master. It does not establish compliance with every local voice or publicity law.

Reason: voice_permission_unknown

Unanswered: Voice Permission

Resolve the listed unknown facts or obtain the exact public policy scope, then check again. You can copy a question and send it to the service yourself.

Provenance: derived_from_user_declared

Coverage: declared master · See stage boundary

Rules: none · sources: none

stage_3 · Your confirmations: Cannot determine

The assessment is limited to a complete, accurate declaration of all tools and the entire final master.

Reason: final_master_attestation_missing

Unanswered: All AI tools listed

Unanswered: Whole finished track described

Unanswered: Answers confirmed as accurate

Unanswered: Release market

Resolve the listed unknown facts or obtain the exact public policy scope, then check again. You can copy a question and send it to the service yourself.

Provenance: user_declared

Coverage: declared master · See stage boundary

Rules: none · sources: none

stage_4 · Whole-track permissions: Cannot determine

This stage checks the declared master, contributors, samples, cover and voice permissions. It does not verify those permissions or the origin of audio bytes.

Reason: final_master_facts_unknown

Unanswered: Distribution Rights

Unanswered: All Contributors Authorized

Unanswered: Key Instruments

Unanswered: All AI tools listed

Unanswered: Whole finished track described

Unanswered: Answers confirmed as accurate

Resolve the listed unknown facts or obtain the exact public policy scope, then check again. You can copy a question and send it to the service yourself.

Provenance: user_declared

Coverage: declared master · See stage boundary

Rules: none · sources: none

stage_5 · Service not selected: Cannot determine

No authority was selected for this goal.

Reason: consumer_scope_not_supported

Resolve the listed unknown facts or obtain the exact public policy scope, then check again. You can copy a question and send it to the service yourself.

Provenance: user_declared

Coverage: tracked_no_rule · See stage boundary

Rules: none · sources: none

Official sources and dates

No policy sources are attached to this report.

Technical rule references

No executable rules support this report.

File and verification details

SAMPLE - not a purchased Passport · version 1 · initial_purchase

Saved 2026-09-09T00:00:00.000Z · assessed 2026-09-09T00:00:00.000Z

This check compares your declared facts with the supported public rules shown here. It does not verify ownership, licences, authorship, copyrightability beyond a selected public rule, the origin of master bytes, or future platform acceptance. SHA-256 is a cryptographic file hash, not an audio fingerprint or proof of origin.

Cryptographic SHA-256 file hash: f058f99868e0aa853f5387a5d7f2f39f412177b7f43c331836b8031f8d4c946d

1 bytes · audio/wav

Workflow relationship: declared by the user; not independently verified.

Envelope SHA-256: 0af8e76c99445233c28827e19056abed5ad4d458e5eeb1d2c056c34c1de44876

Assessment digest: 471f96dbc92422511f54fb785347a811e32b09e262954e49ef793c5295eebb7c
